Patrol Boat 20 m

The 20 m aluminum **Patrol boat** is intended to supervise an indicated seawater, escort other vessels, perform interventional operations, and to support fire extinguishing operations and required SAR services.

The wheelhouse provides four crew seats nearby the control console and, behind them, an additional chart table placed with two double-seated sofas. The space below the deck is divided into six watertight compartments. To ensure comfort for the crew, the boat has been designed both to reach well maritime prowess, meet ergonomic and technical requirements, and also to suit crew expectations. It is dedicated to accommodating four regular crew members along with four additional people. The vessel is adapted to intercept survivors from the water.

To enable supporting and executing activities related to critical national infrastructure, we equipped it with armored weapon cabinet S1 type and foundation for weapon placed on an open foredeck.
