

SE - 414

Inspection Boat 24 m

SE-PW-414 is intended to supervise an indicated seawater, operate while survey and patrol actions, and support search and rescue operations as required SAR services. It is dedicated to accommodating seven crew members and up to 4 additional people.

The wheelhouse provides three crew seats nearby the control console along with a wide, convenient table and cabinets, which ensure comfortable navigation. Two deck space is divided into three individual and four bunk-bed cabins with four sanitary blocks, galley and mess. Both a fore deck and an aft deck compartments are intended to accommodate well-functioning working spaces, stores, and lockers. An open deck space enables effortless mooring and towing, but at the same time is able to contain 5,70 m wide RIB boat.

The vessel ensures 11 days autonomy for all 11 passengers and its range attain up to 1760 Nm while reaching well maritime prowess and provide high safety standards.
